Protocol-v2 replication: three training seeds, fixed data split and DARE mask seed
Six unique task pairs: mean +/- sample SD
across training seeds 42, 43, 44
Mean pair accuracy loss (percentage points)
Delta activation cosine
RTE/COLA
MRPC/COLA
SST2/RTE
SST2/COLA
SST2/MRPC
MRPC/RTE
Within-seed correlations (six overlapping pairs)
Negative rho matches the proposed direction
Spearman rho vs mean pair accuracy loss
Delta activation
Raw activation
Weight delta
Seed 42
Seed 43
Seed 44
Error bars are training-seed SD, not confidence intervals. No significance claim.
